

EURYDICE

Collaborating towards a future in renewable energy

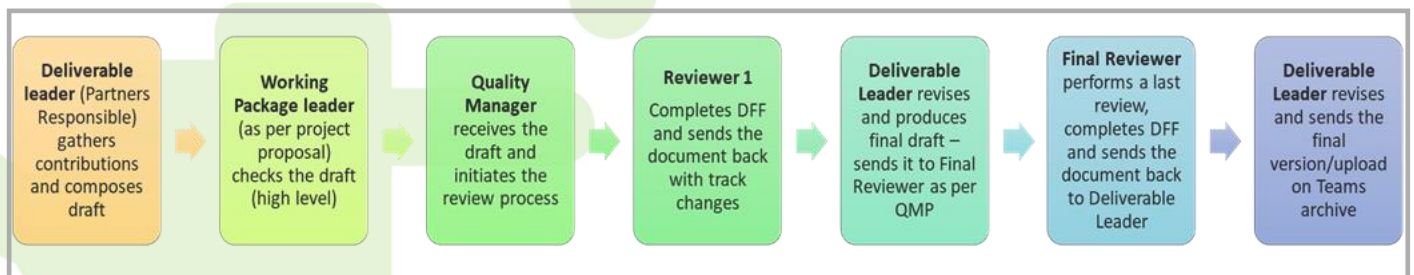

eurydice@cut.ac.za | eurydice.cut.ac.za

Quality Management:

Quality is a key strategic priority that is reflected in every stage of the project life cycle, from the beginning and through to closing. For this reason, the EURYDICE consortium is dedicated to assuring high-quality results. When a deliverable is being completed, it goes through a thorough review process, to ensure a quality result, taking also corrective actions where necessary.

In this respect, the process used in the project is as follows:

- The Deliverable Leader(s) gathers all contributions and composes a draft report which is sent to Working Package Leader.
- The Work Package Leader checks the draft and sends it to the Quality Manager (Deloitte) who will initiate the review process. Reviewer 1 will complete the Deliverable Feedback Form and will send the document with track changes to Deliverable Leader who will revise and produce the final draft.
- The final draft will be sent to Final Deliverable Reviewer who will perform the last review, will complete the Deliverable Feedback Form, and will send both documents to Deliverable Leader.
- The Deliverable Leader will revise accordingly and will produce the final version which will be uploaded on Teams' archive. The Deliverable Leader is responsible for completing the review history according to template.

Co-funded by the Erasmus+ Programme of the European Union
